	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CPR 1.135(a) in no event, however, may a reply be timely field after SIX (8) MONTHS from the mailing date of this communication. If the period or reply specified above is less than thirty (30) days, a reply within the stablety minimum of thirty (30) days will be considered firrely. If the period or reply specified above the greatment withing (30) days, and the specified shows the stablety period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Follows to discretely a specified show the stablety period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Art Unit: 2879

DETAILED ACTION

The Amendment, filed on October 16, 2003 has been entered and is acknowledged by the Examiner.

Cancellation of claims 12.13 has been entered.

The Examiner notes that the finality of the rejection of the last Office action is withdrawn.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 3,684,908 to Beese.

Regarding claim 7 Beese discloses (column 2 lines 16-40 Fig.1) a lamp device comprising a high pressure mercury vapor lamp with an arc tube 11 enclosing luminescent materials and having pair of electrodes 17,18 and a pair of sealed portions 15,16 extending from the tube, a reflector 22 with reflecting coating, a transparent member 21 covering the open end of the reflector. Beese discloses (Fig. 1) that one of the sealed portions 15 of the arc tube is integral with the transparent member 21 and

Application/Control Number: 09/890,127

Art Unit: 2879

the space between the transparent member (light transmissive lens) 21 and the reflector is hermetically sealed. Beese further discloses a cooling means (an electric fan) 58 for removing conducted heat to the outside of the lamp device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 3,684,908 to Beese.

Regarding claim 11 Beese discloses the claimed invention except for the limitation of internal pressure of approximately 200 atmospheres. It has been held that discovering an optimum value of a result effective variable involves only routine skill in the art. Thus, it would have been obvious to one of ordinary skills in the art at the time the invention was made to make the mercury vapor lamp having the internal pressure of 200 atmospheres, since discovering an optimum value of a result variable is considered within the skills of the art.

Allowable Subject Matter

Claims 1 and 9 are allowed over the prior art of record.

The Examiner's reason for allowance of claims 1 and 9 has already been cited in the last Office Action.

Art Unit: 2879

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 5,420,769 to Ahlgren et al. and U.S. Patent 6,575,599 to Imamura et al. disclose discharge lamp with cooling means.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikha Roy whose telephone number is (703) 308-2826. The examiner can normally be reached on Monday-Friday 8:00 a.m. – 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimeshkumar D. Patel can be reached on (703) 305-4794. The fax phone number for the organization is (703) 308-7382.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
